

Referees

Referees

A peer reviewed journal such as the *Australian Occupational Therapy Journal* relies on the generously given time of its referees. Referees for the Journal are required to provide timely and critical reviews of manuscripts. The Editorial Board wishes to acknowledge the hard work of these referees during the past year and looks forward to their continued support in 1997.

Subject index

acquired brain injury

- casting the hypertonic upper limbs of clients with 39
- factors contributing to successful return to school of children with 133
- the effects of the soft splint on hypertonicity at the elbow in clients with 51
- the impact of rehabilitation and early discharge planning on length of hospital stay for children with 105

assessment tools, measuring occupational performance rather than using impairment-focused (Letter) 31

attitudes

- of elderly people and the impact on treatment and discharge planning (Brief Report) 19
- of post-polio survivors and the impact on rehabilitation 60
- of students to care of the elderly parents (Thesis Abstract) 79
- to rural practice 72

autonomic response, a safety guide for the amount and intensity of vestibular stimulation in children with Down's syndrome to improve (Brief Report) 167

autonomy, and the care of elderly parents (Thesis Abstract) 79

Book Reviews 33, 80

Canadian Occupational Performance Measure, used to assess client-centred clinical reasoning 155

cancer, the impact of clinicians' clinical reasoning on patients' adaptive response and their perceptions of the illness experience 125

care, students' attitudes to the autonomy and paternalism of elderly parents (Thesis Abstract) 79

casting

- hypertonic upper limbs of clients with cerebral palsy 39
- the effects of the soft splint on hypertonicity at the elbow 51

causal attribution theory, the impact of clinicians' clinical reasoning on patients' adaptive response and their perceptions of the illness experience 125

cerebral palsy, casting the hypertonic upper limbs of clients with 39

client-centred practice, assessment of a therapist's clinical 155

clinical reasoning

- assessment of a therapist's client-centred approach to clinical practice 155
- of clinicians and the impact on patients' adaptive response and their perceptions of the illness experience 125

community-based, development and evaluation of an early childhood occupational therapy programme 3

coping strategies

- employed by post-polio survivors 60
- for trait anxious students undertaking clinical practice (Thesis Abstract) 186

curriculum, students' perspective of fieldwork and its relationship to coursework 95

discharge planning

- the impact of elderly people's attitudes and self-confidence on (Brief Report) 19
- the impact of rehabilitation and, on length of hospital stay for children with acquired brain injury 105

- Down's syndrome, a safety guide for the amount and intensity of vestibular stimulation in children with (Brief Report) 167
- dysautonomia, the effectiveness of casting hypertonic upper limbs of clients with 39, 51
- early childhood, development and evaluation of a community-based occupational therapy programme 3
- eating disorders, the experience process of (Thesis Abstract) 30
- education
- a comparison of students' attitudes toward and skills for rural practice after rural or metropolitan fieldwork 72
 - enhancing the fieldwork component by studying students' perspectives 95
- elbow, the effects of the soft splint on acute hypertonicity at the 51
- elderly people
- biomechanical research to enhance grabrail prescription for (Thesis Abstract) 185
 - falls in, transfer limitations of, and home hazards and modifications for 13
 - impact of attitudes and self-confidence of, on discharge planning (Brief Report) 19
 - students attitudes to the care of parents (Thesis Abstract) 79
- 'ethnic group', debate regarding its definition and use in occupational therapy (Letters) 187
- falls, in elderly people in the home 13
- fieldwork
- comparison of students' attitudes to rural practice 72
 - students' perspective of, and its relationship to coursework 95
- geriatric rehabilitation, impact of patients' attitudes and self-confidence on treatment and discharge planning (Brief Report) 19
- grabrails, *see* transfer limitations
- head injury, *see* acquired brain injury
- healthcare teams, factors influencing the effectiveness of occupational therapists' practice within 83
- home
- biomechanical research to enhance grabrail prescription for elderly people in the (Thesis Abstract) 185
 - falls, hazards and transfer limitations of elderly people in the, and modifications to the 13
- hospitalization
- factors affecting length of, for children with acquired brain injury 113
 - the impact of rehabilitation and early discharge planning on length of, for children with acquired brain injury 105
- hypertonicity
- at the elbow and the effects of the soft splint on 51
 - upper limb casting for 39
- Letters to the Editor 31, 187
- life-span model, applied to the rehabilitation of post-polio survivors 60
- lifting techniques, assessment of the Measurement of High Risk Work Style to accurately determine the safety of (Thesis Abstract) 185
- Measurement of High Risk Work Style, assessment of its reliability to accurately determine the safety of a lifting technique (Thesis Abstract) 185
- multiculturalism, implications for occupational therapists (Letter) 187
- multidisciplinary services, factors influencing the effectiveness of occupational therapists' practice within healthcare teams 83
- muscle tone
- casting of hypertonic upper limbs and the effects on 39
 - the effects of the soft splint on 51
- neuromotor performance, a safety guide for the amount and intensity of vestibular stimulation in children with Down's syndrome to improve (Brief Report) 167
- oncology, the impact of clinicians' clinical reasoning on patients' adaptive response and their perceptions of the illness experience 125
- orthoses
- the effectiveness of upper limb casting for hypertonicity 39
 - upper limb casting for hypertonicity using the soft splint 51

paediatrics

- factors affecting the length of hospital stay for children with acquired brain injury 113
- the impact of rehabilitation and early discharge planning on length of hospital stay for children with acquired brain injury 105
- casting the hypertonic upper limbs of children with cerebral palsy 39
- development of a community-based early childhood occupational therapy programme 3
- differences in parents' and children's assessments of play skills 142
- factors contributing to successful return to school for students with acquired injury 133
- vestibular stimulation in children with Down's syndrome to improve neuromotor performance (Brief Report) 167
- performance indicators, measures used to evaluate performance of an individual, group or department of therapists (Viewpoint) 172
- play skills, differences in parents' and children's assessment of 142
- post-polio syndrome, coping strategies employed by people with 60
- practice, factors influencing the effectiveness of occupational therapist's practice within healthcare teams 83
- publication of scientific papers, *see* writing for publication
- qualitative research; possible solutions to problems when reporting on and reviewing, for publication (Invited Comment) 178
- range of motion
 - in the upper limbs of clients with cerebral palsy, pre- and post-casting 39
 - the effects of the soft splint on hypertonicity at the elbow 51
- rehabilitation
 - life-span model applied to post-polio survivors 60
 - the impact of, and early discharge planning on length of hospital stay for children with acquired brain injury 105
 - the impact of elderly people's attitudes and self-confidence on (Brief Report) 19
- risk factors, for elderly people in the home 13

rural fieldwork, its impact on students' attitudes and skills relating to rural practice 72

- school re-entry, factors affecting students with acquired brain injury in successful 133
- scientific papers, *see* writing for publication
- self-confidence, in the elderly and the effect on discharge planning (Brief Report) 19
- self-report, assessment of children's play skills 142
- soft splint
 - the effects of, on acute hypertonicity at the elbow 51
 - the single system design and its effect on acute hypertonicity at the elbow 51
- standardized assessments, an analysis of their use as a means of documenting performance indicators and evaluating client progress (Viewpoint) 172
- stress, the effects on rehabilitation of post-polio survivors 60
- students, perspectives of fieldwork and its relationship to coursework 95
- team work, factors influencing the effectiveness of occupational therapists' practice within healthcare teams 83
- Thesis Abstracts 30, 79, 185
- trait anxiety, its effect on students' clinical practice performance and suggested coping strategies (Thesis Abstract) 186
- transfer limitations
 - home modifications and hazards for elderly people with 13
 - biomechanical research to enhance grabrail prescription for elderly people with (Thesis Abstract) 185
- upper limb casting, for clients with cerebral palsy 39
- vestibular stimulation; a safety guide for the amount and intensity of, in children with Down's syndrome (Brief Report) 167
- writing for publication
 - hints for scientific papers (Invited Comment) 24
 - possible solutions for reporting and reviewing qualitative research (Invited Comment) 178
